EDUCATION

Queens High School for the Sciences at York College

September 2023 – June 2027

Cumulative GPA: 95.58/100 | **Dean's Honor Roll**: Fall 2023 – Spring 2026

Relevant Coursework: AP Calculus BC, AP Computer Science A, AP Biology, AP Computer Science Principles

Baruch College

February 2026 – Present

Relevant Coursework: BIO 3002

TECHNICAL SKILLS

Languages: Python, Java, Arduino, HTML

Tools: XCode, Android Studio, VS Code, Git, Onshape

Systems: Ubuntu

Certifications: MATLAB Onramp, CAD Course Completion

EXTRACURRICULARS

STEM Volunteering at Jamaica Central Library, *volunteer*

March 2026 - Present

- Collaborated with a FIRST Tech Challenge official and library staff to set up a robotics STEM center at Queens Public Library in Jamaica.
- Assisted in managing, ordering, and recommending technical equipment, including microcontrollers, 3D printers, servos, and beginner kits.
- Partnered with library administrators to set up summer workshops and activities related to STEM, such as potential robotics classes and hackathons.

QHSS Robotics, *FTC Blue Jays 33379 programming member*

October 2024 - Present

- Programmed components of a holonomic, field-centric drive system.
- Applied Java-based robotics libraries for competition performance.
- Collaborated across programming and hardware teams to optimize robot functionality.

College Now, Baruch College, *Researcher*

January 2026 - May 2026

- Complete college-level coursework on research ethics and methodology.
- Performed research to conduct meta-analysis on the correlation between fast food restaurant density and human littering behavior.

QHSS Hack/Programming, *Member*

September 2023 - Present

- Learned foundational knowledge in computer science concepts such as memory allocation, data representation, and low-level systems.
- Introduced to Hack Club, an international non-profit organization focused on providing coding and engineering opportunities for youth.

QHSS Science Olympiad, *Competitor*

September 2025 - January 2026

- Engineered an Arduino-based vehicle to meet strict time-distance competition constraints for Electric Vehicle.

SYEP @ Laguardia College, *Team Lead*

June 2024 - August 2024

- Led a team to develop a 400+ line Python retail simulation with branching user interaction.
- Managed development team and delivered final presentation to judges with satisfactory rating.

SimplyTrack App, *iOS Developer*

June 2025 - August 2025

- Developed an iOS productivity app using SwiftUI for task and time management.
- Designed interactive UI to streamline personal workflow tracking.
- Shared weekly progress updates within a developer community and shipped the final product.

BigFuture Ambassador, *Student Ambassador*

February 2026 - May 2026

- Delivered college and financial aid guidance to 100+ students via presentations and social media outreach.

Coalition for Asian American Children + Families, *Student activist*

November 2023 - Present

- Advocated for AAPI inclusion in educational and community settings.
- Tasks included NYC DOE meetings and curriculum initiatives, in-person advocacy workshops, and school AAPI-month presentations.

Masjid Al-Taufiq, *Student, Youth Coordinator*

February 2020 - Present

- Coordinated community and charity events as youth coordinator, ensuring smooth execution and engagement.
- Activities include Ramadan preparations, teaching Quranic Arabic to youth, and managing youth programs.

PROJECTS

SimplyTrack App, *iOS App + Web Demo*

- Developed a SwiftUI-based productivity app for task and time management.

- Designed an interactive and simple UI to streamline workflow organization and prevent distractions.
- Deployed a live web demo to showcase functionality and user experience.

Retail Simulation/SYEP Final Project, *Python*

- Built a 400+ line CLI-based simulation modeling user retail experience.
- Implemented decision paths for interactive and enjoyable user gameplay.

COMPETITIONS/AWARDS

FTC NYC Qualifier 9, 12

- Contributed along with team to improve robot's functionality by assessing any structural and programming flaws during pit and between rounds; Aided in presentation during judges panel to demonstrate robot's functionality.

QHSS Hackathon

- Contributed along with 3 other members to solve several logic puzzles and activities, such as website creation, Python problem sets, and product creation and presentation.

STEM in the South Expo

- Designed a web-based game within hourly constraints to raise awareness of food shortages and global hunger problems, winning 3rd place.

Questbridge College Prep Scholars Award

- Selected as a college prep scholar from a competitive academic pool of 3,800 students.
